

Rick Lapenna
Professional Overview

- ✓ Drive value to deliver across major accounts. Develop a vision as outlined by key corporate values and mission statement. Execution on this vision requires clear stewardship across multiple IT disciplines with deep technical depth encompassing multiple technologies and delivery models. This mandate is closely aligned to past demonstrated achievements, promoting a shared vision for innovation and customer success.
- ✓ Delivery on innovative concepts requires leadership to promote collaboration across lines of business and information technology. Formation of a strategy which delivers against key enablers is critical. Milestones can be established and realized in a measurable context which align to Key-Performance-Indicators (KPIs) within multiple SOWs driving consistent delivery against SLAs and OLAs.
